

## Environment Setup

### Create a Flask Project

Team ID	PNT2022TMID26293
Project Name	Plasma Donor Application

#### Code :

The screenshot shows the Visual Studio Code interface with a Python file named `app.py` open. The code is a simple Flask application that imports the Flask module, creates an instance of the Flask class, defines a route for the root path, and runs the application.

```
1 from flask import Flask
2 app = Flask(__name__)
3
4 @app.route('/')
5 def hello_world():
6     return 'Hello World!'
7
8 if __name__ == '__main__':
9     app.run()
```

## Terminal :

```
C:\Windows\System32\cmd.exe X + -
Microsoft Windows [Version 10.0.22621.819]
